Bet Against
the Crowd**

CHALLENGE

When a special event occurs, players receive a question on their mobile device, for example: “Will this free kick result in a goal?”, players can then select their answer.

Depending on the outcome they receive, or lose, points and rank higher on the leaderboard. The one player with the highest score at the end of the match wins. It is up to the contestants to decide on the format of the game.

For example: Does everyone bet equally on an event? Or are some players selected to bet first and everyone else bets if they are right or wrong?

TECHSTACK

- Rails
- SQLite
- Bootstrap
- Git
- Docker
- Azure

SOLUTION

- Fan receives static and event-driven questions
- Every question has an individual duration / end time
- User can decide, how many points to bet (10 point to all in)
- Questions are presented by sponsors
- Questions can be added manually from the Admin

LET'S BET

OUTLOOK

- Additional points for special efforts
(e.g. scanning a QR code, buying a fan article or food / drinks)
- Location based points
- Integrate newsticker
- Foto questions
